

M.G.I.T SOLAR - Unique LED Retrofit Program - Start saving up to 70% of your next lighting electricity bill

M.G.I.T SOLAR conducts an analysis of your existing lighting and energy use. Then utilizing sophisticated computer software, our engineers, will design a lighting solution specific to your requirements before we retrofit MIZUHO JAPAN LEDs. This analysis will be based on factors such as: area of building or facility to be lit, hours of operation, and current energy use.

Our Process is easy like 1,2,3

1. Analysis of your existing lighting and energy use
2. Our engineers, will design a lighting solution specific to your requirements
3. Installing Your New LED Lights by our professional team -
It is guaranteed that you will see immediate savings in your energy bills.

M.G.I.T SOLAR LED Retrofit Program benefits:

- Using state-of-the-art high quality MIZUHO JAPAN LED lighting
- Guaranteed immediate saving in your energy bills.
- Short period ROI (return on investment)
- Various financing options are possible
- Redesign of lighting
- Reduces A/C loads by 1 kilowatt for every 3 kilowatts of lighting energy saved (\$150-250 per ton of A/C saved with Mizuho Japan LED cool technology)
- NO Mercury, Cadmium or Lead
- NO UV or Infrared to degrade artwork or fabrics Average lifetime (can be longer)
- 50,000 lifespan hours (translates to nearly 6 years running 24/7; and nearly 12 years at 12/7)
- Reduces your maintenance bills on bulb and ballast replacement
- Reduces overall carbon footprint by eliminating mercury-laden lighting
- Dark Sky Compliant – Highly directional lighting will not cause light pollution
- Easy Installation can be done by your people or by our people
